

Application Consultancy, Support & Training

Resolving issues with innovative solutions

Our Approach

Our in-depth systems knowledge and industry expertise means we can quickly identify and help resolve issues and implement new solutions.

This can be achieved on an ad-hoc basis when your business or project needs to call on extra resources and experience.

However, we also have an ongoing arrangement with many of our clients who view us as solution partners – some use our resources on a regular basis and some prefer a retainer for convenience.

It is inherent in the CampionPPS approach to share and disseminate our knowledge and skills to your workforce in whatever type of project we undertake. If your business requires focused training then we can deliver programmes tailored to your specific needs. Our experience tells us that much better results are achieved with flexible training solutions.

Our Process

Consultancy

We cover the full spectrum of business functions and modules

Support

We can help you keep your business application in peak condition and provide prompt resolution to system issues.

Training

We design and deliver workshops and training programmes to optimise skills development within your organisation.

Why Choose Us

We understand business; we understand ERP systems and business applications and above all we understand how best to fit these together.

Our in-depth knowledge and understanding of a wide range of business applications means we have a wealth of experience to drawn upon to help us deliver innovative and effective solutions that best fit your organisation.

We can flex and adapt to suit your particular requirements and will ensure you get value for money.

CampionPPS can help **develop, deliver and support** your business applications across the full spectrum of business functions and modules.
