

System Realignment and Optimisation

Optimising your business systems to maximise performance

Our Approach

We understand that after the effort of implementing a new system there is a tendency to get it over the 'Go Live' hurdle as best you can and then leave it that way. The following problems are very common and problems we can help you to resolve:

Out of Alignment: Over time your people, business processes and systems can shift out of alignment resulting in less effective and efficient practices

Lack of Management Information: Often the focus is on the functionality and transactional operations, but the management information benefits are not being fully reaped

Lack of Business Benefits: The basic functionality exists and is working, but with some enhancements real business benefits can be realised

The approach will be a hands-on, in-the-trenches exercise designed to find disconnects between business processes, business system configuration and operational goals.

Our Process

Review

In-depth end-to-end review of business processes and systems

Identify

- People Improvements such as training, restructuring, ways of working
- Process Improvements such as streamlining, applying best practice, re-engineering
- Systems Improvements such as making better use of what's available, introducing enhancements and amendments, additional tools, improved management reporting

Correct & Optimise

Implement the corrective action plan

Why Choose Us

CampionPPS will help you to identify and implement the solutions required to get your system fully aligned and optimised.

Our primary goal is to help you gain strategic and competitive advantages by extending and improving the value of your existing business system.

CampionPPS can.....

- Deliver the performance and payback you expect from your business system
- Effectively configure your business system to support the business practices and operations of your organisation
- Ensure your processes and procedures support the most cost effective use of your business system

Let us put together a System Realignment and Optimisation programme for you to help you to turn your business system into a platform for business success.

The aim of this more in-depth analysis exercise is to ensure that you are getting the **most out of your existing business system** and the investment you have already committed to it. CampionPPS will take you through a programme to help you **identify improvements** and implement the corrective actions.
