

# System Selection and Implementation

## Implementing the right systems, delivering optimum results.

### Our Approach

We understand the systems market place and know that to make the investment count; you must get it right from the beginning.

It is often difficult to allocate the level of internal resources required to such a project without having a detrimental impact on the day-to-day operation of your organisation. We understand this and as such will work as an extension of your team to drive through the process using our wealth of experience.

We have implemented many different business and management information systems for our customers – but we do not have any affiliation with any one product. We will always ensure that the selection process offers up to you the most relevant solutions for your business and your industry.

As well as implementing core ERP systems, we can also implement peripheral systems to maximise the business benefits (e.g. shop floor control systems, reporting tools, EDI, 3PL interfaces).

### Our Process

#### System Selection

- Business Blueprint: 'As Is' and 'To Be'
- Scope Definition
- Identification of solutions / suppliers
- Invitation to Tender
- Assess and score tender responses
- Supplier Short List
- Manage Demos and Reference Visits
- Detailed workshops with suppliers
- Contract Negotiations
- Final Selection & Contract Completion

#### System Implementation

- Implementation Planning
- Project & Programme Management
- Implementation & Delivery
- Application Consultancy
- Training
- Go Live Support

### Why Choose Us

System Selection and Implementation mistakes are all too common and very costly - we will help you get it right first time with our experience, knowledge and control.

The ChampionPPS team has the required blend of business and industry knowledge, systems experience and project management skills to enable us to deliver successful system selection and implementation projects time and time again.

CampionPPS will work alongside your in-house teams and create an environment of knowledge and skills transfer through the whole project – leaving your workforce empowered and informed.

Selecting and implementing a new business system can be a daunting task and represents a significant level of commitment and major financial investment. ChampionPPS combine **trusted industry knowledge** and experience with a **structured, transparent process** to support you through your System Selection and Implementation programme.
